AdPro Mix

FOOD PROCESSING UNIT

AdPro Mix 500

The Advanced Engineering **AdPro Mix** is specifically designed for flexible processing of cold manufactured food products

The variable speed anchor/stirrer and chopping head which can be inter-changed with a high shear rotor/stator head gives built in flexibility to blend, chop, mill, disperse and emulsify. With a recipe system fitted as standard and rapid clean-down between batches, the **AdPro Mix** offers high production rates whilst giving the flexibility to manufacture several different products per day

AdPro Mix with variable speed anchor/stirrer and cutting blades

Bottom entry high shear option

Standard sizes

AdPro Mix 500 - 200 to 500L

AdPro Mix 250 - 75 to 250L

Non-standard sizes are available

The **AdPro Mix** is manufactured in the UK with critical spares available within 24 hours
